HomelessMgr™

Effectively Managing the Homeless for Cities

HomelessMgr™, Mobizent's Web-based Homeless Management solution provides Cities with an effective way to contact and manage the Homeless.
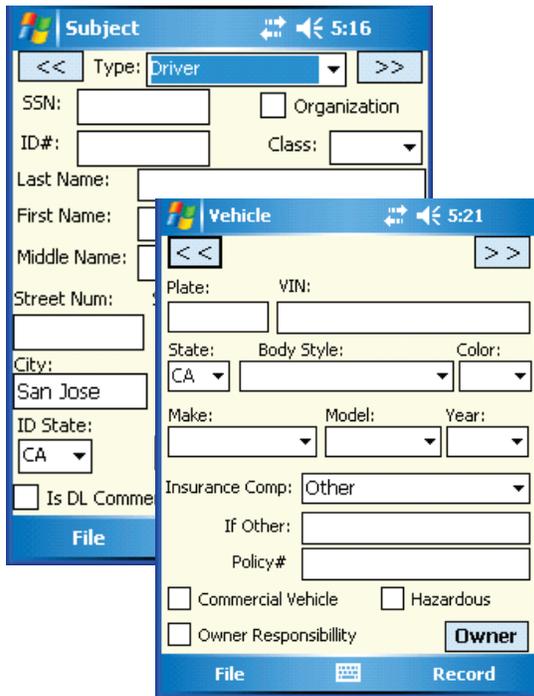

Mobizent product HomelessMgr™ is a comprehensive web based back-office solution for agencies to manage and serve their clients. It provides the management and control of essential information by individuals or families to assess the clients' needs, provide services, track progress and assist with placement.

HomelessMgr™ improves homeless management by having an integrated solution dedicated to collecting the required data for the homeless in one database. HomelessMgr™ ensures that the entire process from contact to placement and monitoring is

streamlined and also provides accurate data for analysis and planning to improve the quality of services provided.

HomelessMgr™ provides a highly sophisticated collection of information modules that work together to allow case workers to provide the best possible service and care for the homeless.

HomelessMgr also has a set of comprehensive interfaces that allow open access to other databases and external systems. The solution can also interface with several other Mobizent

products to use handhelds or the iPhone to collect data and provide GIS capability on the handheld or Web Application.

HomelessMgr is a HUD compliant Homeless Management Information System (HMIS) that helps organizations provide effective, essential services for the homeless or those at the risk of becoming homeless.

HomelessMgr is a cost effective solution that reduces the time spent on manual data collection and analysis processes by a wide disparate group of well meaning people. The HomelessMgr product eliminates this by providing a consistent set of data collected by using an easy to use approach to contact, collect, record and share information.

Features of HomelessMgr:
- ») Integrated client information management system
- ») Easy to use work flow
- ») Shared data between providers
- ») Strong security features
- ») Canned and adhoc reports
- ») Data export capability
- ») Easy to customize
