

Improving Manufacturing with Quality Inspections

InspectCheck™, Mobizent's mobile in-field inspection solution provides an automated method to consistently and effectively collect and maintain inspections For Environmental Protection Departments.

InspectManu™, Mobizent's innovative Mobile Inspection Solution, is revolutionizing the way Manufacturing companies perform inspections such as property, equipment, OSHA and personnel.

With InspectManu™, inspectors can perform field inspections electronically, eliminating the need for paper forms, clipboards and avoid re-entry of data. In addition to standard data capture, InspectManu™ provides the ability to capture drawings, pictures or photos including signatures and record audio. InspectManu™ eliminates the need to remember complex inspection requirements, rules and government requirements, by automating the entire task with pull-downs and online searches.

Field inspectors can synchronize remotely using wireless technology or using the standard synchronizing methods at the

office. InspectManu™ provides the ability to review or lookup previous inspections on demand and standardizing the way an inspection report is written. It also provides the management and control of data to meet new company or government

requirements. The solution not only allows provides the handheld mobile front-end solution but also provides a

complete and feature rich back-office solution to manage the inspections. Inpections can also have approval cycles and roll-up reports to meet the critical time-based inspection requirements. Designed to run on any windows based Mobile Device, including phones, laptops or ruggedized mobile handhelds, InspectManu™ provides highly sophisticated inspection service modules that intelligently work together to allow users to monitor and

control inspections, from a call center solution to scheduling and mapping locations needed for maintenance and inspection personnel. InspectManu™ is a cost-effective solution that reduces the amount of time spent on manual inspections and manual reporting by allowing users to capture all the required information and approvals on the website.

InspectManu™ ensures that the entire inspection process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to save time and money.

Features of InspectManu:

- » Integrated using your required fields
- » Capture Voice recordings
- » Embed Photographs & sketches
- » Easy entry from multiple devices
- » Full reporting and exporting abilities
- » Advanced security features (signature validation)

Benefits of InspectManu:

- » Simplifies and streamlines inspection management
- » Reduces errors, re-work and paperwork
- » Reduces Carbon Footprint
- » Ensures data integrity
- » Enhances data analysis and visualization
- » Increases productivity
- » Integrates with Department network
