

Providing Housing Authorities with Inventory Counts

InventCount™, Mobizent's mobile in-warehouse solution for counting inventory provides an automated method to quickly and effectively count physical inventories for Housing Authorities.

InventCount™, Mobizent's innovative Mobile Inventory Counting Solution, is revolutionizing the way companies and Housing Authorities conduct physical inventory counts for warehouses and even maintenance trucks.

With InventCount™, inventory personnel can perform field inventory counts electronically, eliminating the need for paper forms, clipboards and avoid re-entry of data. In addition to standard data capture,

InventCount™ provides the ability to capture inventory with Scanning your barcodes. The solution also has the ability to create your own barcodes for groups of items or individual items. The solution can also use RFID scanners connected to the device.

to collect more sophisticated tracking of inventory. InventCount™ eliminates the need to remember complex barcodes by automating the entire task with pull-downs and online searches.

Field inventory personnel can synchronize remotely using wireless technology or using the standard synchronizing methods at the office. InventCount™ provides the ability to review or lookup previous inventory counts on demand and

standardizing the way an inventory count is written, inventory mismatches are provided as required. InventCount™ can also provide the management and control of inventory by properties to meet new HUD requirements for property management, when used in conjunction with our InventoryMgr™ product. The solution not only allows provides the handheld mobile front-end solution for counting and verifying inventories, but can also provide a complete and feature rich back-office solution to manage the inventory counts. Inventory counts can roll-up reports to meet the critical time-based requirements to reconcile with the General Ledger and roll-up by property.

Designed to run on any windows based Mobile Device, including phones, laptops or ruggedized handhelds, InventCount™ provides highly sophisticated service modules that intelligently work together to allow users to monitor and control inventory counts. InventCount™ is a cost-effective solution that reduces the amount of time spent on manual inventory counts and manual reporting by allowing users to capture all the required information directly on the handheld or website.

Features of InventCount:

- » Integrated bar-coded fields
- » Integrated with Existing Database
- » Full reporting and exporting abilities
- » Easy entry from multiple devices
- » Advanced security features (signature validation)
- » Customizable to Authorities requirements

Benefits of InventCount:

- » Simplifies and streamlines inventory counting
- » Reduces errors, re-work and paperwork
- » Reduces Carbon Footprint
- » Ensures data integrity
- » Enhances data analysis and visualization
- » Increases productivity
- » Integrates with Department network
