

TicketWorks™ and the ES400

Electronic Ticketing in a new phone sized platform

TicketWorks™, Mobizent's mobile ticketing application and the Motorola ES400, provides officers the ability to issue citations efficiently and effectively using a cutting edge mobile enterprise digital assistant.

Ticketworks™ and the Motorola Es400 provides a compact and comprehensive Law Enforcement Ticketing package for Citation issuance and Field investigation. TicketWorks™ not only allows Traffic Citation issuance but with the Motorola Es400 provides a platform that the officer can put in thier shirt pocket and eliminate the need for the addtional cellular phone. Designed to run on any windows based Mobile Device, TicketWorks™ provides highly sophisticated modules that intelligently work together with the Motorola Es400 to allow officers to complete error free citations in the least amount of time. In addition to the Mobile Framework, TicketWorks™ also has comprehensive back-office system that easily and seamlessly integrates into agency's databases, Court Systems and DMV systems.

The image shows two overlapping screenshots of the TicketWorks application interface. The top window is titled 'Subject' and contains fields for 'Type' (set to 'Driver'), 'SSN', 'ID#', 'Last Name', 'First Name', 'Middle Name', 'Street Num', 'City' (San Jose), 'ID State' (CA), and 'Is DL Comme'. The bottom window is titled 'Vehicle' and contains fields for 'Plate', 'VIN', 'State' (CA), 'Body Style', 'Color', 'Make', 'Model', 'Year', 'Insurance Comp' (Other), 'If Other', 'Policy#', and checkboxes for 'Commercial Vehicle', 'Hazardous', and 'Owner Responsibility'. Both windows have a 'File' button at the bottom.

TicketWorks™ and the Motorola Es400 improves data collection, prints an accurate citation, and eliminates the need to re-enter data into additional systems.

TicketWorks™ and the Motorola Es400 provide a cost-effective package that reduces the amount of time spent by allowing officers to scan/swipe Drivers License to capture all the subject information, scan registration to capture all Vehicle Information and select relevant information from pre-

populated list of violations. In addition, TicketWorks™ and the Motorola Es400 also provides latest technological features like capture GPS co-ordinates for Location address, photo capture, Incident sketch drawing, Voice Recording, and mugshots retrieval. Mobizent's famed "Make-Similar" logic allows officers using TicketWorks™ to complete and issue a citation within 90 seconds.

TicketWorks™ and the Motorola Es400 ensures that the entire process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to ensure that Law Enforcement Agencies save time and money. TicketWorks™ "Investigative Search" feature provides data analysis and data visualization capabilities to investigative officers during crime investigation. TicketWorks™ also provides a complete electronic ticket record that not only provides the standard required fields, but also provides a back-office solution to allow officers to manage the ticket data. Our back-office solution provides interfaces to the local RMS, the courts, mapping of ticketing data, searching of the ticket database and many other critical applications.

Features of TicketWorks:

- › Electronic scan of license and registration
- › Pre-defined lists and options
- › Printing to portable printer
- › Advanced security features (biometric, signature validation)
- › Wireless or Direct Synchronization
- › Customizable to Department requirements

Benefits:

- › Simplifies and streamlines ticket writing
- › Reduces paperwork
- › Reduces Carbon Footprint
- › Ensures data integrity
- › Enhances data analysis and visualization
- › Increases officer productivity
- › Integrates with Department Network
